Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gaku et al (5,082,402).

Gaku et al ["Gaku"] discloses a method of drilling a through-hole in a printed circuit board panel which comprises placing a water-soluble lubricant sheet on one surface or each of two surfaces of a printed circuit board panel and drilling a through-hole through the printed circuit board panel. The water-soluble lubricant sheet has a thickness of 0.05 to 3 mm and comprises a mixture of 20 to 90% by weight of a polyethylene glycol having a weight average molecular weight of not less than 10,000, and 10-80% by weight of a water-soluble lubricant. See column 1, lines 39-68. The water-soluble lubricant comprises polyethylene glycols, polyoxyethylene monoethers, polyoxyethylene esters, polyoxyethylene sorbitan monoesters, polyglycerin monostearates, and polyoxyethylene-propylene block polymers, all of the water-soluble lubricants having a weight average molecular weight of 500 to 9,000. See column 2,

Art Unit: 1764

lines 23-46. The water soluble lubricant sheets are placed on one plastic or metal foil surface. See column 3, lines 5-13. The examiner is of the position that Gaku meets the limitations of applicants claimed lubricant sheets and methods of making a hole in a printed circuit board.

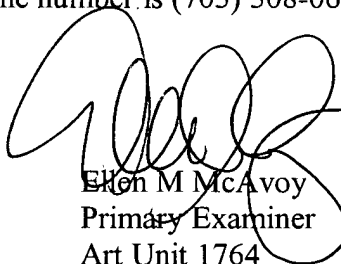

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicants' disclosure.
